

# V FRAMEWORK

## V-FRAME OF PATTERN THINKING

DEVELOPED BY

Mayank Vikesh Kumar Sharma

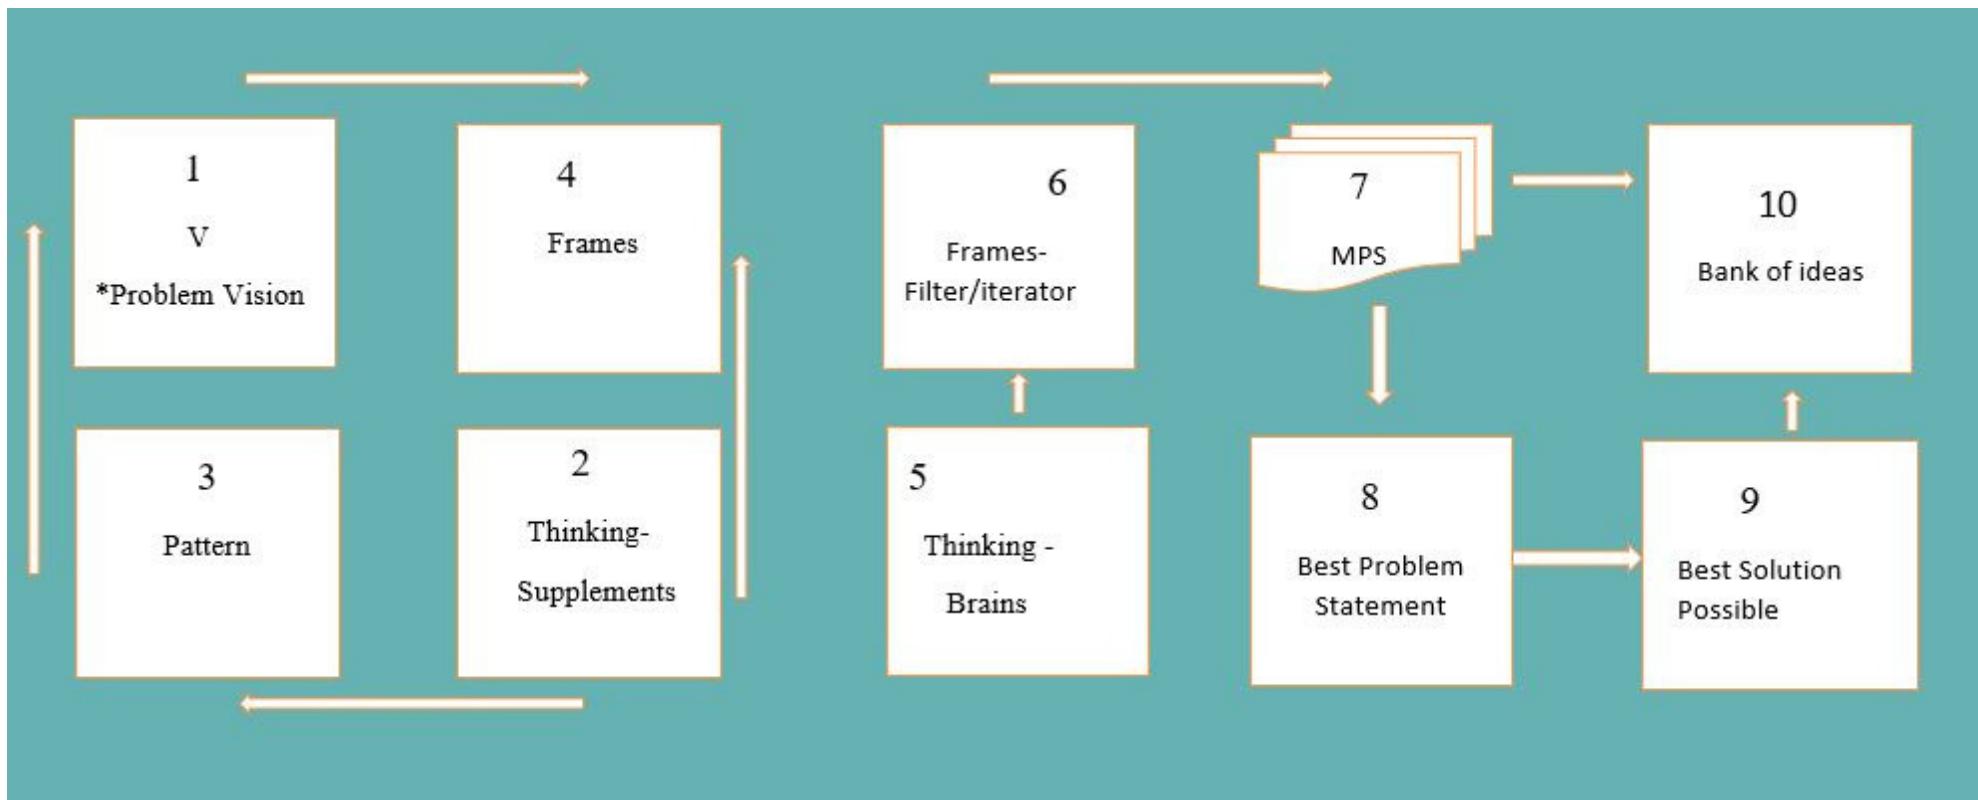

The background features a large, light gray vertical rectangle on the left side with a subtle grid pattern. Overlaid on this are several arrows: a large yellow arrow pointing right, a smaller red arrow pointing right below it, a teal arrow pointing right at the bottom left, and a thin yellow arrow pointing right near the center.

# what is a V-Frame?

A FRAMEWORK TO GENERATE  
IDEAS AND UNLEASH BRAIN  
THINKING CAPACITY

# FRAMEWORK

# BLOCK DEFINITIONS

1

## Vision Block

This Block is used to identify any particular area of problem on which you will target your vision.

2

## Thinking Supplements

Here you will have a little warm up with your brain. You need to think and search the latest trends, technologies and solution going around with the problem area that you identified. It will help you to think faster.

3

## Pattern

This block asks you to define or design your patterns in which you will perform brainstorming or pain storming.

Decide the schedule or occurrences of time in where you will follow this template for e.g. following daily, weekly or monthly.

4

## Frames

The meaning of frame here will be the keywords or problems you observed in the problem area while working on.

5

## Thinking Brains

You need to unite brains of your team or friends to put their critical thinking on your frames.

6

## Frames Iterator

One by one you or your team will start iterating the keywords or frame. You will check the frames feasibility to problems area, they are realted and deserve to stay in your list.

7.

MSP- Multiple problem statements.

With filtered keywords you will create a problem statement for each one. Every person has to generate at least 2 or 3 problem statements for particular keyword.

8.

Best Problem Statement

Out of multiple Problem statement gathered select the best problem statement which needs to be address. Problem Statements are the ideas.

9.

### Best Solution Possible

Think multiple solutions for a problem statement and then come up with best solution possible as per you.

10.

### Bank of Ideas

This is most important part. Here you will collect all the problem statements which were good when you generated multiple problem statements but can wait to get address and solutions also.

This bank will be your asset containing your ideas which you are collecting day by day

# Key Points

Follow the Framework in sequence .Numbers are in Block.

Keep following framework at least one time in a week to produce best results

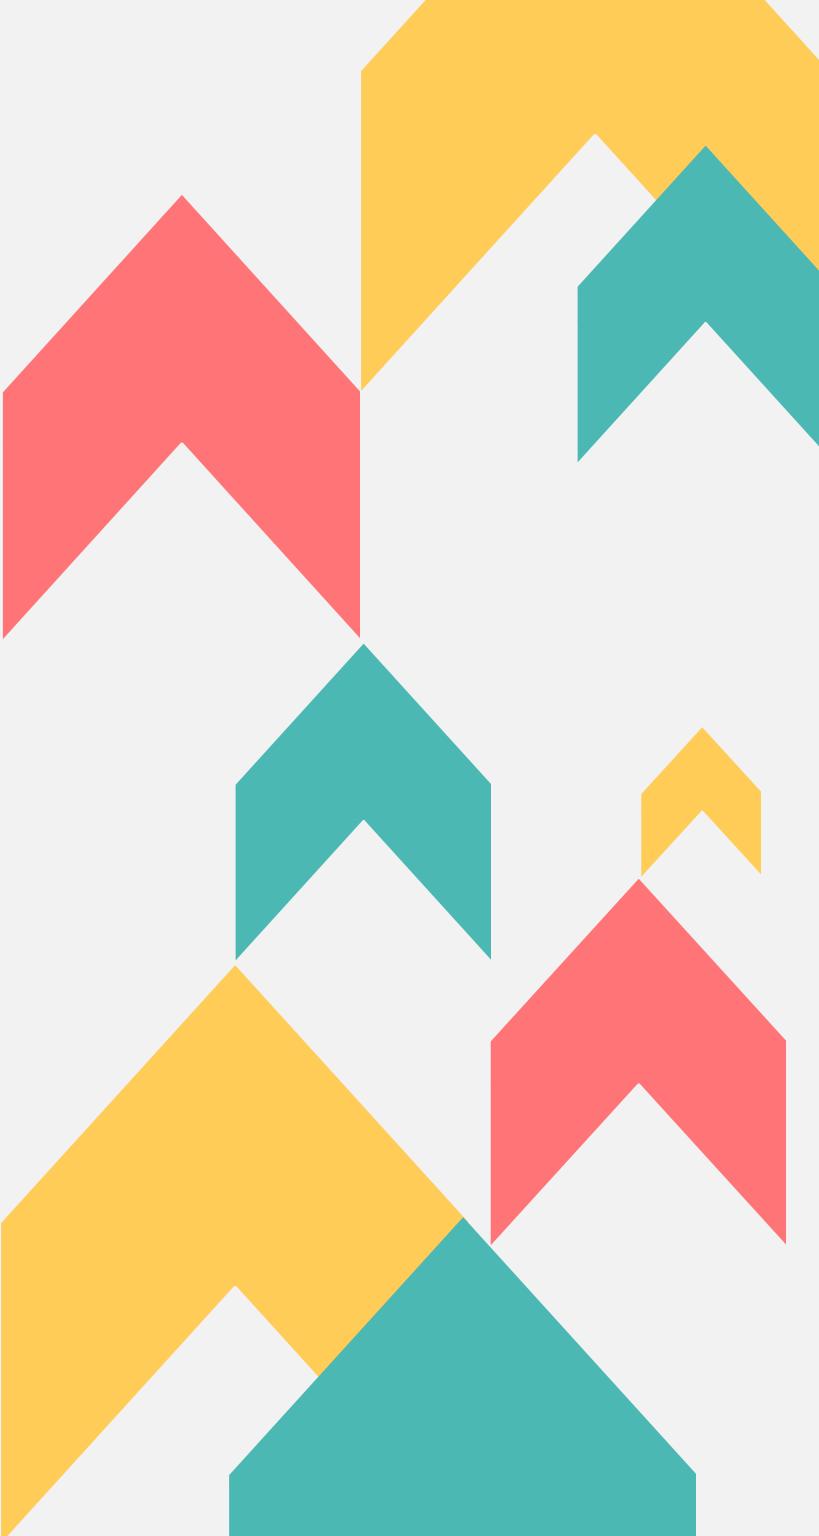

You are free to add any additional block around the existing structure. Helping additional block between can help you more as we have different industries market and it may require to add some additional parameters while thinking.

The Framework is basic architecture of intelligent process of thinking. It helps you think in structural way so that you can learn a technique to run your brain in any situation.

Using this framework within a team can help organizations to produce huge sets of innovating ideas.

thank  
you!
